Professional Summary

Computer Science student interested in frontend development, full-stack development, networking, operating systems, and modern web technologies. Hands-on experience building applications using React and Flutter, along with backend development and system-level programming fundamentals. Skilled in developing scalable web applications, AI-powered platforms, and real-time systems using modern frameworks and databases. Passionate about building real-world software projects, exploring computer systems and networking concepts, and continuously learning emerging technologies.

Education

Bachelor of Engineering in Computer Science Engineering

Expected May 2027

Dhanalakshmi Srinivasan Engineering College, Perambalur, Tamil Nadu

Relevant Coursework: Artificial Intelligence and Data Science, Web Analysis and Data Analysis, Web Technologies, Big Data, Database Management Systems, Operating Systems, Computer Networks

Technical Skills

Programming Languages & Technologies:

C, C++, Java, Python, Go, HTML, CSS, JavaScript, React (JSX & TSX), Flutter, SQL

Backend Development:

Django, Node.js, Flask, FastAPI, Express.js

Database Skills:

MySQL, PostgreSQL, SQLite, MongoDB

Server & Deployment:

Linux Basics, Nginx, Apache, Docker, CI/CD Pipelines

Tools & Platforms:

Git, GitHub, VS Code, Firebase, Supabase, Windows, Linux Environment

Projects

Medical Imaging and Lab Report Explainer AI

- Built a secure offline AI application that analyzes medical reports and generates explanations for patients and clinicians.
- Developed using FastAPI, GPT4All (Phi-3 Mini), HTML, CSS, and JavaScript.
- Implemented PDF/text extraction, local AI inference, accessibility-focused UI, and trusted medical citation support.
- Focused on privacy-first architecture with fully local processing and no external API usage.

Studentz Bangalore – Student Community Platform

- Built a student-focused community platform for reporting and tracking academic, campus, and wellbeing-related issues.
- Developed using React, Vite, Node.js, Express.js, and MongoDB.
- Implemented issue submission workflows, reference ID-based tracking, and responsive user interfaces.
- Designed scalable backend APIs and database models using Express and Mongoose.
- Website: studentzbangalore.vercel.app

Nexora – Smart Personal Finance & Expense Tracker

- Developed an AI-powered finance tracking application with expense analytics, OCR-based receipt parsing, and machine learning expense prediction.
- Built using Next.js, React, Tailwind CSS, Firebase, and Scikit-learn.

- Implemented automated expense categorization, budget alerts, interactive dashboards, and PDF report generation.
- Integrated Firebase Authentication, Firestore cloud sync, and OCR processing using Tesseract.js.

AI Learning Platform for Kids

- Built an interactive AI-powered learning platform featuring voice tutoring, handwriting OCR, quizzes, and parent analytics.
- Developed using React, Vite, FastAPI, GPT4All, EasyOCR, and Edge-TTS.
- Implemented AI handwriting feedback, speech synthesis, gamified learning streaks, and animated educational experiences.
- Designed a responsive glassmorphic UI with accessibility-focused interactions.

CineSnap – Social Platform for Movie Enthusiasts

- Developed a Flutter-based social application for cinephiles to share cinematic moments and discover movies.
- Integrated Firebase Authentication, Firestore, Firebase Storage, and Supabase.
- Implemented dark-themed glassmorphic UI, staggered grid layouts, and responsive user experiences.
- Used Provider for efficient state management and optimized media-sharing workflows.

Beginner Operating System Project

- Explored the development of a bootable operating system from scratch.
- Learned about bootloaders, memory management, and low-level system programming concepts.
- Worked with Assembly language and C for understanding system internals.

Additional Information

- Strong interest in frontend engineering, full-stack development, networking, and operating systems.
- Passionate about AI-powered applications, scalable backend systems, and modern UI/UX design.
- Quick learner with strong problem-solving and self-learning abilities.
